STRONG CONNECTIONS WITH OUR GLOBAL BUSINESS PARTNERS!

YOUR GLOBAL SUPPLY PARTNER

Demsay Elektronik was founded in Istanbul in 2014 with the mission of providing fast, reliable and cost-effective solutions to the Electronics Industry. What started as a small office has grown into a global organization with modern office spaces, advanced production facilities and a strong international supply network.

Today, Demsay operates through our offices in USA, Romania and Shenzhen, as well as our warehouse in Hong Kong, enabling fast and flexible supply operations across the USA, Europe, and Asia. With our wide distributor network and strong partnerships with leading manufacturers worldwide, Demsay supplies even hard-to-find components with competitive prices. As a reliable partner, Demsay combines global sourcing power with local expertise to provide cost-efficient and sustainable supply solutions.

Demsay serves customers in Defence, Aerospace, Automotive, Medical, Industrial and Educational sectors. With our 25 air shipments weekly and 4 sea shipments per month, Demsay ensures fast and secure delivery of semiconductors, passive components, connectors, electromechanical parts, cables, PCBs, display solutions and more.

Discover the Advantages We Provide You with Our 10 Years of Experience

Affordable Price

We are able to offer the most affordable prices thanks to our close relationships with many manufacturer/distributor partners around the world and our access to different resources.

Fast Delivery

We are Turkey's fastest electronic component supplier with our express shipments, wide network and import experience.

Global Reach

Thanks to our branches, partner offices and shipments points in different parts of the world, we have access to many resources.

Quality Service

In the supply of electronic materials, we provide the components you need, thanks to our reliable and solid relationships with the world's leading companies.

R&D Process

Embedded Hardware and Software Development.

Product Testing Process

Firmware Upgrade, Hardware and Software Testing.

Purchasing Process

Supply and Purchasing Process of Electronic Components and PCBs.

PCB Supply and Assembly Services
